

OUTDOOR/CONTROLLER

Technical Datasheet

STANDALONE CONTROLLER-8CH

WORKING ENVIRONMENT

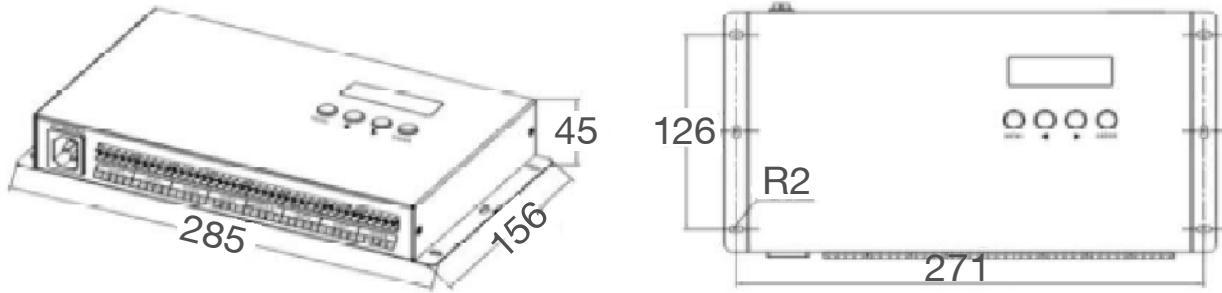

- Please do not install the controller in magnetic, high pressure, high temperature or seriously wet environment.
- Please do connect the earth safely in order to reduce risks of fire and damage which cause by short circuit.
- Please ensure AC100-240V power supply is used, and same polarity is connected between transformer and controller in order to guarantee the proper supply voltage.
- No waterproof function in the control system, please pay attention on rainproof and waterproof during installing.

TECHNICAL SPECIFICATION

| | |
|--------------------------|---|
| Cover Material | Iron |
| Operating temperature | -15°C ~ +60°C |
| Humidity | ≤50% RH |
| Power consumption | <3W |
| Environment | IP20 |
| Cascade signal | Optocoupler |
| Master controller signal | Ethernet protocol |
| Network interface | RJ45 Ethernet interface |
| Output signal | TTL & RS-485 * 8 channels |
| Control capacity | upto 154 Sub-controllers or 4,00,000 channels |
| Transmission distance | Use UTP (unshielded twisted pair) cable, distance between the controllers can be |
| Weight 1500gm | 2050gm |
| Dimension | 285mm(l) x 156mm(w) x 45mm(h) |
| Pixel driven | Single chip: 960 pixels x8 channels, Single-wire: 1024 pixels x8 channels, standard DMX512: 168 pixels x8 channels, extensible DMX: 336 pixels x8 channels, Break-point resume: 960 pixels x8 channels. |

CONNECTION INSTRUCTIONS

INPUT IMPORT

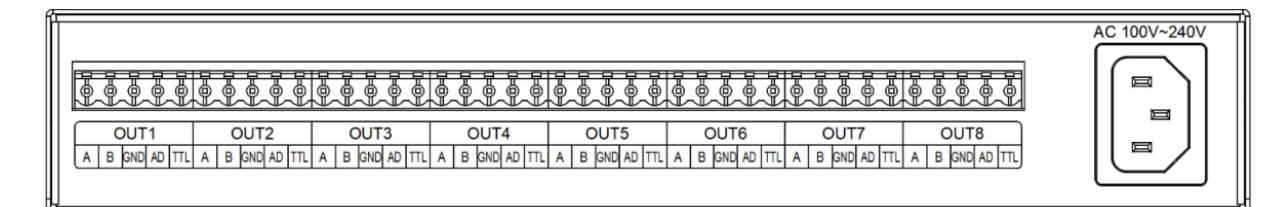

INTERFACE

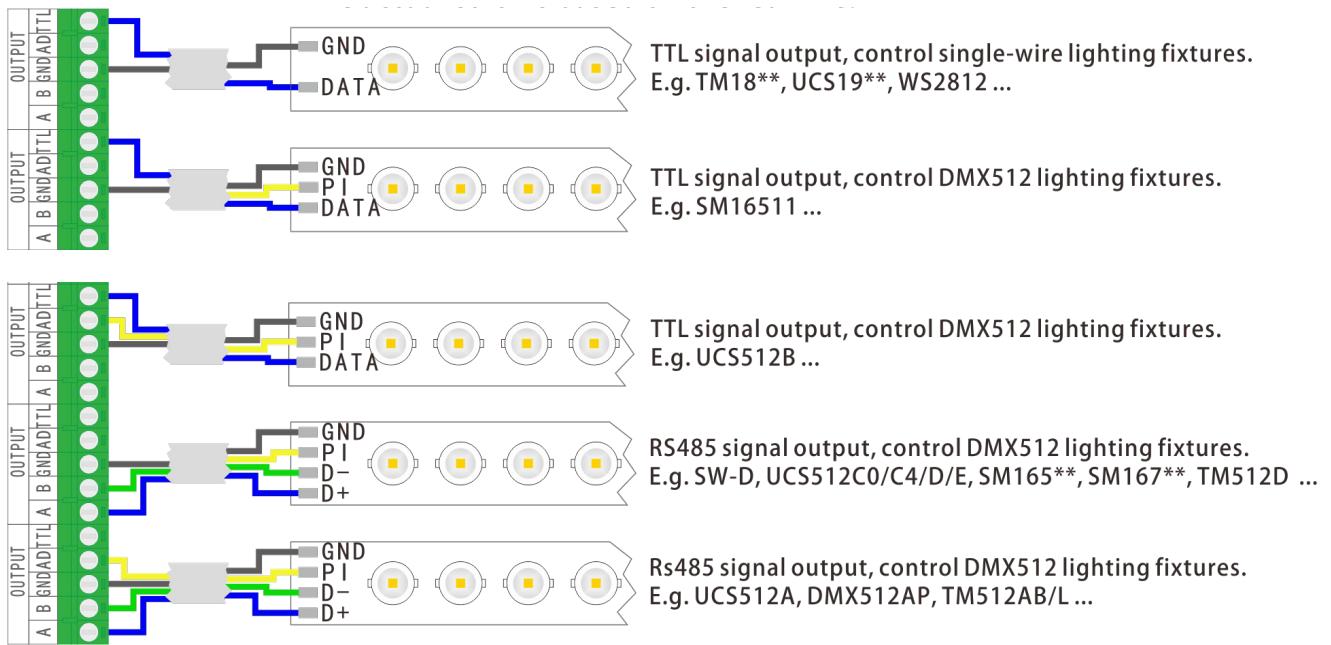

FUNCTION

| | |
|------------------|--|
| Audio | Audio input, connect with audio equipment. |
| In & out | Input / output of cascade. |
| Work | Working light, it flickers according to frame rate when working properly. No flicker indicates abnormal or non-working status. |
| SD | SD card slot. |
| Mode | Increment, use for changing effect. |
| Speed. | Set the effect speed. |
| DMX in & DMX out | Connect with DMX512 controller. |
| Com | Reserved interface. (Advanced application.) |
| Remote | Remote antenna interface. (Optional function.) |
| BTS | BTS antenna interface. (Optional function.) |
| GPS | GPS antenna interface. (Optional function.) |

OUTPUT WIRING

CONTROLLER

SIGNAL CABLES CONNECTION CAUTIONS:

- Use UTP—Unshielded Twisted Pair (resistance per 100M<10Ω), low quality Ethernet cables, telephone cables and copper wires are unavailable.
- Use one group twisted pair, suggest green+green white or orange+orange white. The quality and color of the cable are very important. Blue and brown wires greatly influence the signal transmission. Please don't use several groups of twisted pairs together.
- Controller signal output GND must connect directly with input GND of lighting fixture. Cannot connect with lighting fixture through power supply.
- Switch on the controller after all hardware signal and power cables are connected. Please don't CONNECT / DISCONNECT the signal cables while the controller is power on; avoid back-flow current burning circuit and components of output port.

TRANSMISSION DISTANCE:

| Transmission Type | Signals | Medium | Distance (M) | Remark |
|---|---------|-----------------------------|--------------|--|
| Master control → slave control | RS-485 | UTP-Unshielded Twisted Pair | 50-100 | |
| Master/slave control → SW lighting fixture | TTL | UTP-Unshielded Twisted Pair | 30-50 | |
| | | Two core wire | 5-30 | |
| Master/slave control → Single-wire lighting fixture | TTL | UTP-Unshielded Twisted Pair | 5-20 | |
| | | Two core wire | 1-5 | |
| Master/slave control → DMX lighting fixture | RS-485 | UTP-Unshielded Twisted Pair | 30-50 | The address cable must be no more than 5m. |
| | | Three core wire | 1-20 | |
| | | Four core wire | 1-20 | |
| Master/slave control → SW lighting fixture | TTL | UTP-Unshielded Twisted Pair | 5-20 | Controllable pixels reduce if wire is over 5m. |
| | | Two core wire | 1-5 | |
| | | Three core wire | 1-5 | |
| Single-wire lighting fixture → Single-wire lighting fixture | TTL | UTP-Unshielded Twisted Pair | 1-2 | Controllable pixels reduce if wire is over 1m. |
| | | Two core wire | 0.1-1 | |

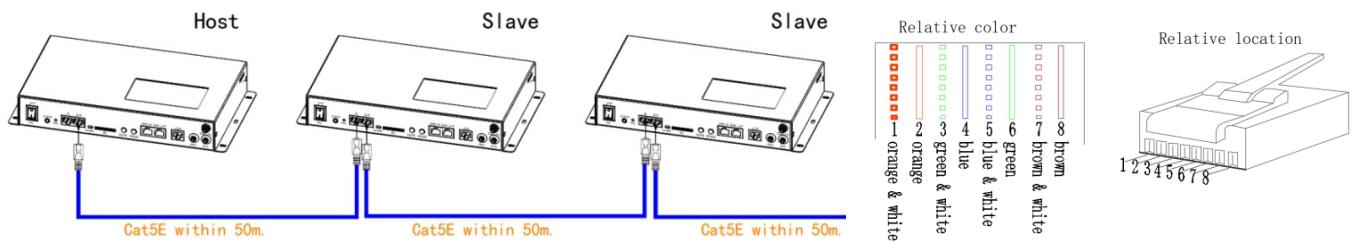

CONTROLLER

CASCADE CONNECTION

When the project needs to be controlled by multiple cascading controllers, connect the host with slave controllers by cables to make the whole project synchronous. The distance must be no more than 50M. (Add an AP100 in every 50m to enhance transmission signal.)

User can extend the cables based on real requirement (cable extension should follow T568B method).

Operation refers to the “CASCADE CONTROL” section.

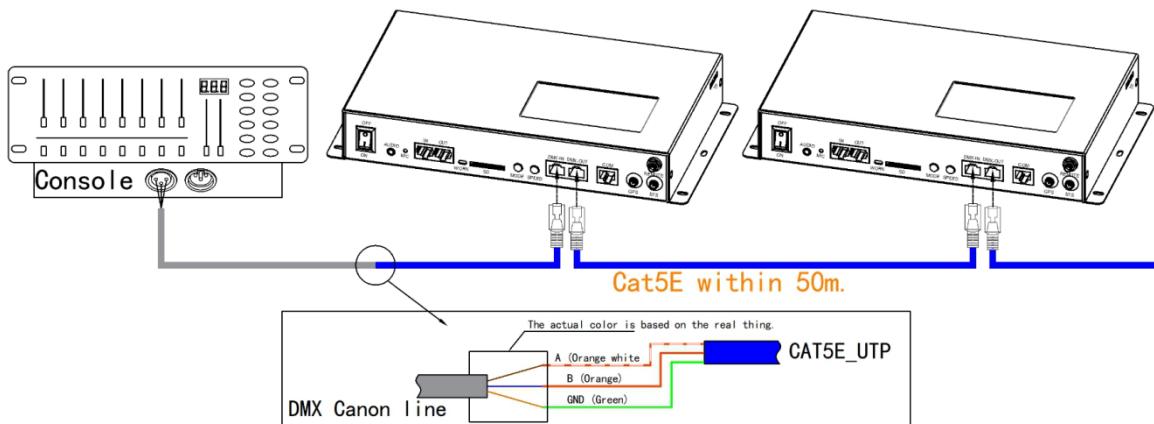

CASCADE CONNECTION

User can adjust the effect, speed and brightness by DMX512 console.

Connection:

P1 = GND, P2 = D-/B, P3 = D+/A

Operation refers to the “DMX512 CONTROL” section.
